# Seasonal Products & Industry Characteristics

- The main selling products are seasonal **down jackets** for **autumn and winter seasons**. Raw materials are prep ready during end of the year, mass production to begin in beginning of the year, quantities to be delivered from mid-year to October.
- Production of thin jackets and trousers will begin during winter period for spring and summer wear. This is to coincide with the Chinese four seasons: plowing in the spring, weeding in summer, harvesting in autumn, depository/hibernating in winter.
- The operating revenue of the four quarters' as per following: **1<sup>st</sup> Quarter: 9%, 2<sup>nd</sup> Quarter: 23%, 3<sup>rd</sup> Quarter 45% and 4<sup>th</sup> Quarter: 23%**. The operating revenue for 1<sup>st</sup> quarter is generally lowest, while the 2<sup>nd</sup> quarter is liable to balance it. The 3<sup>rd</sup> and 4<sup>th</sup> quarters will usually have massive output delivery and is accountable to be the key highlight of the year. These are some of the **key characteristics** of **down jackets industry**.
- Due to seasonal factors, we have to **plan our production pipeline**. The ideal cooperation with our clients would be to **pre-order in advance** which can lessen the production pressure during peak season and making sure on-time delivery. This is a **win-win solution** for customers and QVE.

# Business Development

- As the OEM for the world's leading sports and outdoor brands, we are constantly exploring partnership with other **well-known fashion brands** (ex: Ralph Lauren, Porsche Design, Ferrari... etc) to create value add to them. We are also actively exploring partnership with **luxury brands** (ex: Moncler, Paul & Shark, Zegna... etc). We believe that our revenue will grow with the increase in customers' base.
- In particular, we have been **certified by** the United States **GORE-TEX** to authorize us to produce GORE-TEX series for our clients, which will definitely create an infinite pool of potential products. **Montbell, Aigle, Nike, Patagonia, Kailas** and other well-known brands have placed their orders with us, and we are actively seeking for other brands to join the wagon.
- The management team regularly makes adjustments and assessments to effectively balance the production throughout the low and peak season. It is also **likely to venture into** sports and functional **knitwear collection**.
- On Oct 27, 2017, we have **signed a share purchase agreement** to **acquire a 60% stock with Atlanta Garment Manufacturing Company**, and continue to expand market share in the global middle high-end knitwear market. Atlanta Company became our Jordanian subsidiary in Jan 2018.

# Business Development

- QVE has exclusively developed the **new synthetic jacket - Micro Puff series** with Patagonia at 2017. Micro Puff series also **won the best insulation jacket award of 2017 Outdoor show in Germany** and had received many positive feedback from market.
- **Thermoball, the new generation prototype** leading to new trends and technologies. It helps TNF **evolves from traditional grid system** and developed more active and energetic styles on sport wares.
- For the steady development of the company's business, we have touch base with high-end outdoor brand Mammut and sportswear leading brand Under Armor many years ago, and expect to ship next year. In addition to sportswear and knitwear, **Under Armor** currently urgently needs to expand its functional jacket market, which is exactly what our company specializes in.
- **Mammut**, high-end outdoor brand from Switzerland, is known for its top craftsmanship. Each product provides maximum comfort at the same time, able to withstand the harsh environment test. Our R&D technology has ensured top quality to keep in pace with the world's top partners.
